AirCub

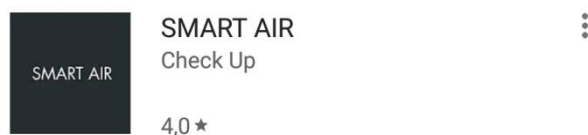

Air Purifier and Air Freshner

AirCub configuration procedure

Pairing APP – System

1. The user will install the "SMART AIR PURIFIER" APP in his smartphone;

2. Activate the Bluetooth and the info position of your smartphone;
3. With the APP started, approaching the smartphone to AirCub, we will proceed to the pairing. From now on the APP will display the paired device showing whether this is reachable or not.

Activation of a new scented filter

1. By approaching the AirCub (in the part representing the symbol: ) the tag on the scented package, the machine will be enabled to use this capsule. The use is timed, after which the operation of the perfumer will be inhibited.

Scented filter terminated

1. When a capsule is finished, the perfumer will send to the associated smartphone and with app installed a finished capsule message that will appear on the terminal as a notification.
2. The user can use another capsule by repeating the procedure in paragraph 1.2.

Operating cycle parameters table

From the side menu, you can activate one of the following operating cycles, depending on the size of the compartment to be treated:

Cycle 1: small environment (0.75 m³);
Cycle 2: medium environment (1.5 m³);
Cycle 3: large environment (3 m³);

Lifetime (since inserting the filter): 1 month

LED description

Red: live machine

Blue: active ionizer

Flashing green: lack of perfume

Steady green: active perfumer

Pairing multiple AirCub devices

Multiple AirCub devices can be configured simultaneously using the SMART AIR App.

It will be enough to approach your smartphone to the AirCub that we want to configure and repeat the procedure described above.

Whenever we are close to the device we will be able to manage it and to receive any notifications (such as "perfume capsule completed").
